1. Vue 組件結構: 基本觀念和語法

單一組件: 如果程式碼越來越龐大 變的難以維護,也無法多人一起協作,就必須切割

2. 組件的切割 : 將網頁根據實際的畫面區塊切割成多個組件

根據畫面的區塊切割成二個組件: Nav.vue (導覧列) 和 Main.vue (主區塊)

4. 實際演練 : 將導覽列切割出去: 將 App,vue 複製至 Nav.vue 然後將 nav相關的留下,其他刪除

      > OUTLINE
```

在 App.vue (根組件)引入 子組件(nav.vue 及 main,vue)

跑出來的畫面: 正常
