1. Vue 樣板的用途: 可以根據程式的資料產生最終的畫面:

2.0 : 今天二個主題 : if 判斷式 及 迴圈

2. if 判斷式, 使用 v-if = "布林值" 語法:

3. 使用 if ... else if ... else 判斷式: 使用 v-else-if = "布林值"語法 ,必須搭配 v-if 使用,可搭配 v-else

4. for迴圈 – 陣列 : 使用 v-for="變數 in 陣列"語法

5. for 迴圈 – 陣列索引 : 使用 v-for="(變數,變數)" in 陣列的語法: 其中第二個變數為索引:

6. for 迴圈 - 物件:使用 v-for="(變數,變數) in 物件"語法

7. 開始寫程式: if 判斷式:

```
index.html
                JS main.js
                                V App.vue X □ package- ∏ ···
src > ♥ App.vue > {} template > � main > � div
      <template>
